

The coronavirus pandemic has been devastating so far. **12 million cases and 1.6 million deaths in India.** In this scenario, coronavirus insurance is a must.

**The number of cases continue to rise and so does the fear.**

**Did you know that a single hospitalization due to covid-19 can drain you out of your savings?**

Yes, a 10-day coronavirus treatment can cost you between **2-12 lakh**. With the third largest cases in the world, it is important to understand the financial impact of this disease.

According to the Union finance and health ministry last year, **only 4% Indians hospitalized due to covid-19 had health insurance.**

## What is coronavirus health insurance?

Many of you would be able to guess that it is a health policy that covers medical expenses incurred on treatment of covid-19.

That's right! Since, covid-19 is a relatively new disease, it doesn't come under pre-existing health conditions of your regular health insurance. A regular health insurance may cover standard hospital expenses, ICU charges, and quarantine in recognized hospitals, but what about the rest?

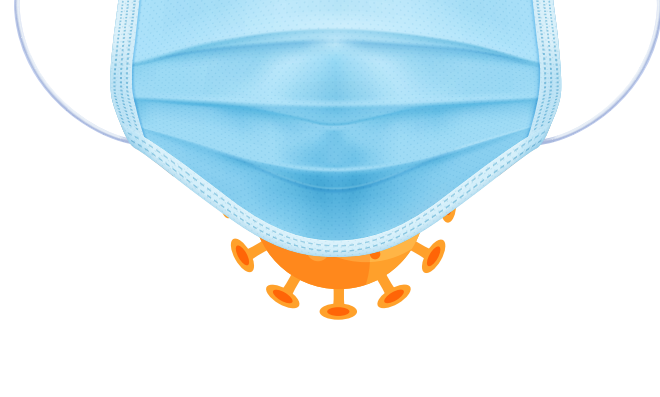

**Here are four key reasons why you should get one too:**

Coverage for coronavirus treatment with zero additional cost.

Treatment at home, if suggested by the doctor.

Consumable expenses such as PPE kits, ventilators, masks and gloves are taken care of.

Availability of cashless treatment and other add-ons.

## Your warrior: **Corona Kavach** or **Corona Rakshak**?
